1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 3 sheets, including this cover sheet.
3. This report is also accompanied by ANNEXES, comprising:
 - a. ☐ (sent to the applicant and to the International Bureau) a total of _____ sheets, as follows:
 - ☐ sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).
 - ☐ sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.
 - b. ☐ (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) _____, containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).

4. This report contains indications relating to the following items:

- ☒ Box No. I Basis of the report
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

The subject matter of claim 1 appears to be novel and to involve an inventive step, since the constitution described in claim 1, in which "a device used as a component to form the said solid electrolyte is immersed in a polyimide silicon solution for forming a film capable of blocking electrons," is neither described nor suggested in any of the documents cited in the ISR.

The subject matter of claim 2 appears to be novel and to involve an inventive step, since the constitution described in claim 2, in which "the said capacitor device is immersed in a polyimide silicon solution, to form a film capable of blocking electrons, and subsequently to form a solid electrolyte layer composed of the said conductive polymer," is neither described nor suggested in any of the documents cited in the ISR.

The subject matters of claims 3-6 appear to be novel and to involve an inventive step, since the constitution appearing to be described in claims 3-6, in which "a device used as a component to form the said solid electrolyte is immersed in a polyimide silicon solution for forming a film capable of blocking electrons," or "the said capacitor device is immersed in a polyimide silicon solution, to form a film capable of blocking electrons, and subsequently to form a solid electrolyte layer composed of the said conductive polymer," is neither described nor suggested in any of the documents cited in the ISR.
